## ACKNOWLEDGEMENTS

---

The willingness of the RIDGE Project to undertake this vitally important, multi-year initiative demonstrates their commitment to provide abstinence until marriage education programs and resources for youth in 15 counties in northwestern Ohio. I sincerely appreciate the support and assistance provided by the following individuals:

- ❖ Catherine Tijerina
- ❖ Dana Junge
- ❖ Desirey Rodriguez Silva

I am greatly indebted to the program participants who completed the evaluation surveys. Their willing contributions of time and thoughtful suggestions were crucial in successfully completing the evaluation.

I am also extremely grateful for the dedication to this research shown by members of the Applied Research Center staff:

- ❖ Darlene G. Campbell
- ❖ Gabe Campbell
- ❖ Gitana Lapinskaite
- ❖ MaryAnn Baker
- ❖ Amy J. Walton
- ❖ Joann C. Mikesell
- ❖ Matthew Allen

Darlene G. Campbell was an invaluable member of the Evaluation Team on this project. Darlene contributed significantly as project coordinator through ongoing consultation, survey development, sample selection, database management, computer programming, data entry, data analysis, report preparation and other important aspects of the evaluation. Amy J. Walton provided assistance with the web-based survey collection and data analysis. Gabe Campbell designed the web-based survey and monitored surveys submitted online. Gitana Lapinskaite, MaryAnn Baker, and Matthew Allen contributed through data entry of pre- and post-test surveys. Joann C. Mikesell provided assistance by matching the pre- and post-test surveys and completing other related clerical tasks. The assistance of all staff members was necessary to complete the evaluation successfully. Finally, I assume full responsibility for the contents of this monograph.

*Robert L. Seufert*

## INTRODUCTION

---

The RIDGE Project evaluation is premised on accountability being an important reason for program evaluation; furthermore, the major goal should be to document and, if necessary, improve program performance and outcomes, thereby giving participants and funding sources better value for their time and money (Newcomer, Hatry, and Wholey, 1994). Consequently, effective evaluation provides a sound basis for action (Rossi and Freeman, 1982; Wholey, 1994).

Open-systems, formative and summative evaluation procedures were used to provide consulting, evaluation guidance, and outcome evaluation to the RIDGE Project personnel (Kibel, 1994). In open-systems evaluation, the Evaluator is an integral part of the process, facilitates collaboration and coordination across all aspects of project planning and execution, and allows the project personnel to actively participate in the design and implementation of the evaluation procedures. Ultimately, the RIDGE Project personnel have a highly developed evaluation framework available to guide their programming and progress toward attaining mandated abstinence education outcomes.

The topics covered in the standardized questionnaires (contained in Appendix E) were derived from the goals and objectives of the CBAE (Community-Based Abstinence Education) initiative and the RIDGE Project personnel. During this first year of the evaluation, survey questions were developed, data collected, alpha reliability values calculated, and factor analysis completed in order to select items (i.e., related questions) that measure abstinence education outcomes. Using standardized questionnaires allows progress on immediate, intermediate, and mandated federal abstinence education outcomes to be more accurately assessed. The statistical analysis is based on a complete matched data from 2,533 program participants in grades 6 through 12.

The 15 counties served by the RIDGE Project include **Allen, Auglaize, Defiance, Fulton, Hancock, Henry, Licking, Mercer, Ottawa, Paulding, Putnam, Sandusky, Seneca, Van Wert, and Williams** counties (the map of service area is included in Appendix D). All 15 counties are rural and have been identified as being un-served or underserved with abstinence until marriage education. In addition, 10 counties have Hispanic and migrant youth populations above the state average, seven (7) counties have unemployment rates exceeding the state average, and 12 counties have teen birth rates higher than the State of Ohio average.

Table 1 shows the 2005 and 2006 birth rates for the State of Ohio and the 15 counties in which the RIDGE Project provides services.

\*Rates are number of births per 1,000 females in the age group  
Ohio Department of Health Center for Vital and Health Statistics

In response to the aforementioned problems, the RIDGE Project and its subcontractors provide abstinence until marriage program activities to youth in the 15 targeted counties. In each community served, the goal is to enroll students ages 12 to 18 with one or more program activities using the *Choosing the Best*, *Game Plan*, *Navigator*, *Relationships Under Construction (RUC)*, and *RSVP* curricula. By providing services and encouraging teens to practice sexual abstinence until marriage, the intended impact is to reduce teen pregnancy, decrease teen STD rates, and reduce other risky behaviors such as tobacco, alcohol, and drug use by teens.

According to the 2007-2008 RIDGE Project grant proposal, their program goals are to provide direct abstinence education and related services to teens in 15 Ohio Counties, including at-risk youth, Hispanic teens, and teen leaders in all of Ohio to:

1. Decrease sexual activity among youth in the program compared to other youth
2. Increase the proportion of teens who make a decision to remain abstinent until married following programming (among youth sexually active as well as those who have never engaged in sexual activity).

In addition, the following objectives were identified in the RIDGE Project grant proposal:

1. Enroll students ages 12 to 18 in curriculum-based abstinence education programs.
2. Provide abstinence education to 32,188 students in a 15-county area during and after school.
3. Provide 15 professional trainings to reach 300 professionals.
4. Empower local youth coalitions throughout the state by developing and expanding the statewide Youth Congress with three meetings.
5. Provide parent and community member events/education to reach 4,000 parents.
6. Target at-risk youth with mentoring and intensive abstinence programming in-school and after school to reach 350 students.
7. Expand the Hispanic Abstinence Education Outreach with youth leadership development component.
8. Increase community awareness and knowledge through media, events, and distribution of informational/educational materials.

The Federal Guidelines (A-H), Section 510 of the 1996 Welfare Reform Act, require educational or motivational programming to explicitly teach the following:

- A. Social, psychological, and health gains to be realized by sexual abstinence
- B. Sexual abstinence outside marriage as the expected standard for all school-age children
- C. Sexual abstinence is the only certain way to avoid out-of-wedlock pregnancy, sexually transmitted diseases, and other associated health problems
- D. A mutually faithful monogamous relationship in the context of marriage is the expected standard of human sexual activity
- E. Sexual activity outside the context of marriage is likely to have harmful psychological and physical effects

- F. Bearing children out-of-wedlock is likely to have harmful consequences for the child, the child's parents, and society
- G. How to reject sexual advances, and how alcohol and drug use increases vulnerability to sexual advances
- H. Importance of attaining self-sufficiency before engaging in sexual activity

Programming for the RIDGE Project was provided by the following eight collaborating programs:

- ❖ CARE Project
- ❖ Effective Educational Seminars (at-risk youth groups)
- ❖ Heartbeats of Freemont
- ❖ National Hispanic Abstinence Outreach
- ❖ Project REACH
- ❖ Project Respect
- ❖ Rites of Passage
- ❖ SolidSource

The remainder of this report includes the following information:

- ❖ Literature Review and Theoretical Framework
- ❖ Executive Summary
- ❖ Methodology
- ❖ Evaluation Results
- ❖ Conclusions and Recommendations
- ❖ References

## LITERATURE REVIEW AND THEORETICAL FRAMEWORK

---

Since 1996, when Title V of the Welfare Reform Act defined sexual abstinence education, new abstinence education programs adhering to this definition have been implemented throughout the United States. To date, the body of research on abstinence education shows mixed results as to the effectiveness of abstinence education at positively changing adolescents' sexual behavior, due in part to the newness and diversity of programs. Additionally, schools and parents resist participation in studies inquiring about actual sexual behaviors in school children, and finally, few studies of abstinence-only education programs adhere to rigorous standards of evidence required to draw clear conclusions from the data (Kirby, 2002).

The findings of some researchers have told us that the abstinence-only message is likely to have a greater impact on youth in grades 7 through 10, where fewer of the students have initiated sexual intercourse. This is also an age range where little disagreement among adults (even those who do not support the concept of abstinence until marriage) that postponing sexual activity is a healthy choice. (LeCroy and Milligan, 2003). Additionally, research on individual abstinence programs has shown statistically significant gains in knowledge about and attitudes toward abstinence (i.e., viewing abstinence as the best way to prevent STDs and pregnancy) (Barnett and Hurst, 2003; Carter-Jessop, et al., 2000; Denny, et al., 1999; Lieberman, et al., 2000; Borawski, et al., 2001) and, in some cases, showed reduced sexual activity (Denny, et al., 2002). Results are also mixed but somewhat positive for a facet of abstinence education: Formal and informal virginity pledges (Brückner and Bearman, 2005; Bersamin, et al., 2005).

It is important to note that the above authors indicated a need for rigorous longitudinal studies of the programs developed from a valid theoretical framework to better measure sexual behavior changes and other outcomes, a major goal of the present evaluation. Finally, emerging studies will further clarify the relationship between abstinence education and adolescent knowledge, attitudes, and behaviors.

Appropriate theory provides a logical framework for understanding, influencing, and predicting human behavior. Consequently, the Evaluator's use of salient theoretical variables could provide the RIDGE Project personnel with a means for enhancing the CBAE initiative. For instance, theories

that have strongly influenced prevention research and programs similar to those included in the CBAE initiative include:

- ❖ Health Belief Model
- ❖ Social Cognitive Theory
- ❖ Theory of Reasoned Action and its variant Theory of Planned Behavior

Those related theories suggest that four primary factors may influence an individual's behavioral intentions and subsequent behavior as it applies to sexual abstinence and abstinence education:

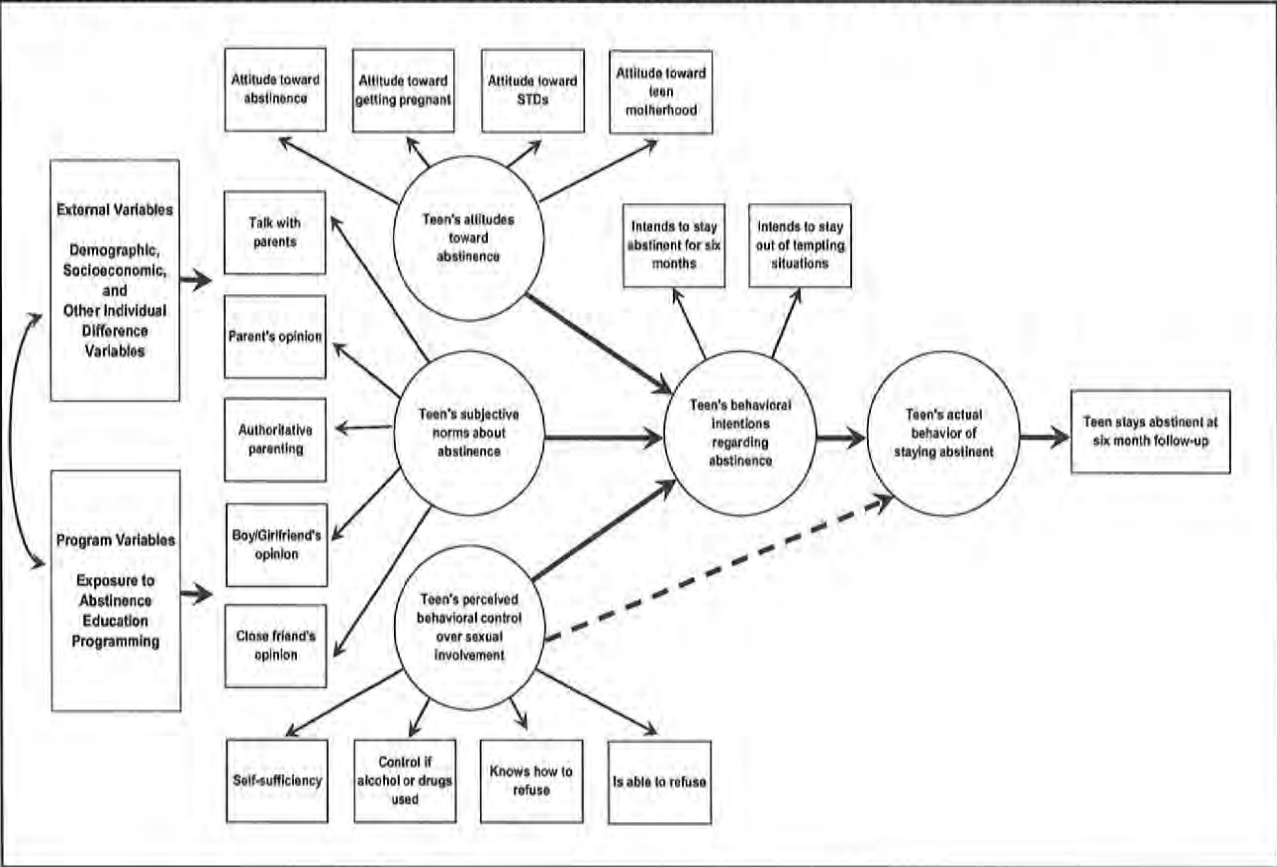

1. **Perceived Risk:** The individual's perception that he/she is personally susceptible, at some level, to engaging in "risky behavior" and experiencing the subsequent consequences such as teen pregnancy or a sexually transmitted disease (STD);
2. **Attitudes:** The individual's attitudes toward performing the specific abstinence-related behavior, which is based on one's belief about the positive versus the negative consequences of performing that behavior;
3. **Perceived Norms:** Perceived norms, which include the perception that "significant others" with whom the individual interacts most closely relative to personal relationships (e.g., family members, boyfriends or girlfriends, close friends, school and community peers and norms, etc.) support and encourage the individual's attempts to follow recommended abstinence behavior; and
4. **Self-efficacy:** Self-efficacy, including the individual's perception that he or she can perform the appropriate and recommended abstinence behavior under a variety of difficult or challenging circumstances (see Fishbein, Cappella, and Hornik, 2002).

The above theories and derived statements have recently been combined to form an Integrated Theory of Planned Behavior depicted in Figure 1 on the following page (Fishbein, Cappella, and Hornik, 2002). However, that theoretical model fails to include potentially important program constructs such as those associated with the RIDGE Project. Figure 2 (on the following page) illustrates the Evaluator's conceptualization of one way to include those important constructs in the theoretical model and to think about ways to further understand and enhance the RIDGE Project (Seufert, et al., 2006).

remaining sexually abstinent, etc.) and prevent “bad” outcomes (e.g., acquiring STD’s, pregnancy, etc.), the more favorable their attitudes should be toward performing the behavior. Similarly, the more participants believe that specific referents or “significant others” (i.e., parents, boyfriends or girlfriends, close friends, and school and community peers) think they should perform the abstinence behavior, the more they will be motivated to comply due to greater social and normative pressure. Finally, the more a teen perceives he/she has the necessary skills and abilities (including educational information and knowledge) to perform the behavior even when facing barriers or obstacles, the stronger the teen’s self-efficacy will be toward performing the behavior (see Fishbein et. al., 2002). Therefore, the probability of the RIDGE Project participants complying with program recommendations should vary as a function of the theoretical constructs and the substantive characteristics of the teen relative to those constructs. The Integrated Theory of Planned Behavior was used in the design of standardized evaluation questionnaires. Figure 3 depicts the Integrated Theory of Planned Behavior as it was tested during the RIDGE Project evaluation.

Figure 3. Theoretical model for examining teen sexual abstinence based on the Integrated Theory of Planned Behavior (Fishbein et. al., 2002; Ajzen, 1991)

## EXECUTIVE SUMMARY

---

This section of the report provides an overview of the survey results for the RIDGE Project. The data analysis is based on 2,533 cases with matched pre- and post-test surveys. Data was received from 5 of the 8 program providers, and for 10 of the 15 targeted counties.

T-tests were used to determine if there was a statistically significant difference between the pre- and post-test. Effect size describes the magnitude of a treatment effect. This differs from significance tests because it measures the meaningfulness of the results independent of sample size and allows comparison between studies (Kotrlík & Williams, 2003). For this report, we are using the Cohen's *d* statistic to estimate effect size for dependent samples t-tests. A score of .20 to .49 indicates a small effect size, .50 to .79 signifies a medium effect size, and .80 and above denotes a large effect size. However, because statistically significant results are more likely to be found in large sample sizes, Cohen's *d* measures whether the actual effect of the program is small, medium, or large, independent of sample size.

Consistent with goals and intent of CBAE, the following concepts derived from the *RIDGE Project* survey of abstinence education program participants showed a statistically significant increase or improvement from pre- to post-test according to t-test results of the following scales, and the Cohen's *d* scores suggest the program had a small effect on program participants in the following areas:

- ❖ Attitudes toward Sexual Abstinence until Marriage  
( $p \leq .001$ , Cohen's  $d = .30$ )
- ❖ Intentions to Choose Sexual Abstinence until Marriage  
( $p \leq .001$ , Cohen's  $d = .28$ )
- ❖ Attitudes toward Sexual Activity before Marriage  
( $p \leq .001$ , Cohen's  $d = .11$ )
- ❖ Consequences of Teen Motherhood  
( $p \leq .001$ , Cohen's  $d = .35$ )
- ❖ Other Risks and Consequences of Sexual Activity before Marriage  
( $p \leq .001$ , Cohen's  $d = .47$ )
- ❖ Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs  
( $p \leq .001$ , Cohen's  $d = .28$ )
- ❖ Ability to Reject Sexual Advances  
( $p \leq .001$ , Cohen's  $d = .17$ )

Overall, t-test results indicate there was little change from pre- to post-test and the Cohen's *d* score suggests the program had little to no effect on the following:

- ❖ Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use  
( $p \leq .05$ , Cohen's  $d = .02$ )
- ❖ Participation in Risky Behaviors Involving Sexual Activity  
(Cohen's  $d = .01$ )
- ❖ Intentions to Continue Alcohol, Tobacco, and Other Drug Use  
(Cohen's  $d = .01$ )

Regarding intentions to remain sexually abstinent until marriage, the survey results suggest that participation in the RIDGE Project programming had a positive effect on the short-term outcomes regarding the above components of the abstinence education initiative. On the post-test, 75% of all program participants indicated they plan to abstain from sexual activity until marriage, which is a 9% increase from pre- to post-test. In addition, 37% of post-test respondents who reported they had previously been sexually active indicated they plan to renew their commitment to virginity until marriage, which is a 15% increase from pre- to post-test. Also, 85% of those reporting they have never engaged in sexual activity on the post-test said they plan to abstain from sexual activity until marriage, which is an 8% increase from pre- to post-test.

Overall, the results of the survey indicate that participants in the RIDGE Project experienced positive changes in knowledge, attitudes, and intended behaviors. The survey results also suggest that respondents benefited from their participation in the program in the following ways:

- ❖ More positive attitudes toward sexual abstinence until marriage.
- ❖ Greater knowledge of the consequences of teen motherhood.
- ❖ Increased knowledge of the other risks and consequences of having sex before marriage.
- ❖ Greater awareness of the risk of sexual activity after drinking alcohol and/or using drugs.
- ❖ Increased ability to reject sexual advances.

Nearly all of the program participants recognized the benefits of the RIDGE Project programming. On the post-test, 91% of the respondents agreed with the statement, "This program helped me understand the consequences of sex outside marriage." According to their survey comments, participants found the sessions to be very informative, thought the program was helpful, realized the importance of abstinence until marriage, appreciated the instructors' efforts, and enjoyed participating in the program activities.

After reviewing the evaluation results, program personnel should focus on the following recommendations to further enhance the program (all recommendations are bolded and italicized):

***Recommendation 1: Identify control schools or groups and collect data from them to more effectively evaluate the RIDGE Project programming.***

***Recommendation 2: Develop a plan for collecting follow-up survey data (at 6 months and 12 months after program conclusion) and submit for evaluation to determine the long-term effects of programming.***

***Recommendation 3: Collect and submit data from all eight program providers.***

***Recommendation 4: Review and revise the sampling plan to include only schools and other groups that will receive services and be completing pre- and post-test surveys.***

***Recommendation 5: Review the evaluation results and revise survey instruments to accurately measure topics covered in the RIDGE Project programming.***

## METHODOLOGY

---

This section of the report provides a brief overview of the methodology used in the 2007-2008 evaluation of the programming provided by the RIDGE Project.

***Evaluation Plan Finalization:*** To refine the research design/evaluation plan and document the implementation process, Dr. Robert Seufert and his Evaluation Team collaborated with the RIDGE Project personnel to maximize the value and worth of the study. The Evaluation Team referred to past CBAE-related evaluations, such as the Abstinence Committed Education (ACE) of Southwestern Ohio and Abstinence 'Til Marriage Education (ATM), to develop an evaluation plan.

***Questionnaire Development:*** The Evaluation Team, in collaboration with the RIDGE Project personnel, developed survey instruments covering topics derived from the goals and objectives of the RIDGE Project grant proposal. The primary purpose of questionnaire development is to collect information to assist the RIDGE Project personnel in evaluating the effectiveness of the abstinence education program. The wording of the questions and response categories were structured so that language was appropriate to the target population (i.e., youth ages approximately 12-18). The final set of topics and questions, which were in both paper and web-based form, were approved by the RIDGE Project personnel prior to the onset of data collection.

***Sample Selection:*** The RIDGE Project coordinator estimated they would serve over 30,000 students during the 2007-2008 program year. Due to financial constraints, a proportionate, stratified sample of approximately 50% of all program participants was randomly selected, taking into account each program, county, school, and grade. Pre- and post-test surveys were matched using demographic information (i.e., the first initial of the respondent's mother's first name, birth month and day, gender, and race). A matched sample of 2,533 cases was used for the data analyses.

***Data Collection:*** The RIDGE Project staff and/or collaborators collected pre-test data prior to program participation, and post-test data following program participation. The survey data were collected by the RIDGE Project program providers both in paper form and via the Internet. The paper surveys were then sent to the Applied Research Center at Miami University where the data was entered into a computer file, and the web-based survey data were submitted via e-mail.

**Data Analysis:** In the Evaluation Results Section, the survey data is reported by index, overall as well as by program. The tables in the Evaluation Results Section include the pre- and post-test mean scores, t-test results, and effect size scores. For more detailed survey data, Appendix A contains the results of each individual question reported overall and by program, county, grade, sex, and race. In addition, Appendix E contains a copy of the RIDGE Project questionnaire.

Because the pre- and post-tests were matched by each individual student, statistical testing and results are based on individual-level data. To determine if the sessions had any effect on the attitudes, knowledge, and behavioral intentions of individuals, dependent samples t-tests were conducted on pre- and post-test data for specific outcome-related questions. A dependent samples t-test compares the mean score of the same individuals tested at two separate times (i.e., pre- and post-test). T-tests are conducted to measure changes as a result of programming, and these changes are stated in terms of statistical significance, which is reported as a 'p' value. For example,  $p \leq .001$  means the pre-test to post-test changes would occur by chance only one time or less in 1,000. Likewise,  $p \leq .01$  indicates changes from pre-test to post-test would occur by chance only one time or less in 100, and  $p \leq .05$  denotes changes from pre- to post-test would occur by chance only five times or less in 100. In the absence of a matched control group, using the dependent samples t-test provides a rigorous evaluation of the programs and the impact on participants toward reducing sexual involvement and preventing pregnancy among teens.

Mean scores for t-tests are based on a 5-point Likert Scale method (i.e., 5 = yes, definitely; strongly agree; or excellent, and 1 = no, definitely not; strongly disagree; or poor). Thus, the higher the mean score, the closer the results are to the most desired response. Some survey questions were included that run contrary or counter to the RIDGE Project Performance Measures. This was done so participants are encouraged to carefully consider their responses. For example, the most desired response to the following statement, "The best way to avoid a pregnancy before marriage is to use contraceptives/condoms" would be "strongly disagree." Because the statement is contrary to what is desired by the specified Performance Measure, it was recoded for data analysis so "5 = strongly disagree, 4 = disagree, etc."

Effect size describes the magnitude of a treatment effect. This differs from significance tests because it measures the meaningfulness of the results independent of sample size and allows comparison between studies (Kotrlik & Williams, 2003). For this report, we are using the Cohen's *d* statistic to estimate effect size for independent samples t-tests. A score of .20 to .49 indicates a small effect size, .50 to .79 signifies a medium effect size, and .80 and above denotes a large effect size. These scores are included in tables for each index in the Evaluation Results section.

***Survey Reliability Tests:*** The multivariate analysis involved the use of factor analysis and Cronbach's Alpha coefficient of reliability. Factor analysis was used for its data-reduction capability since it is an efficient method of discovering predominant patterns among a large number of variables (i.e., questions) such as those selected for inclusion in the RIDGE Project surveys. Cronbach's Alpha coefficient of reliability or consistence measured how well a set of items (or variables) measure a single latent construct. Cronbach's Alpha values for the reliability of items included in all scales will be within acceptable limits (Cronbach, 1951; Nunnally, 1978). Appendix C includes tablea with the factor analysis scores and Cronbach's Alpha values for each index.

## EVALUATION RESULTS

---

The following data analysis is based on 2,533 cases with matched pre- and post-test surveys. The objectives listed in the RIDGE Project grant proposal are addressed below.

**Project Goals: To provide direct abstinence education and related services to teens in 15 Ohio Counties, including at-risk youth, Hispanic teens, and teen leaders in all of Ohio to: 1) Decrease sexual activity among youth in the program compared to other youth; and 2) Increase the proportion of teens who make a decision to remain abstinent until married following programming (among youth sexually active as well as those who have never engaged in sexual activity).**

Data was received from 5 of the 8 program providers (CARE Project, Project REACH, Project Respect, Rites of Passage, and SolidSource), and for 10 of the 15 identified counties. Regarding decreasing sexual activity among youth in the program compared to other youth, no control schools or groups were identified to compare with program participants. The goal to increase the proportion of teens who make a decision to remain abstinent until married following programming is addressed in the following three performance outcomes included in the RIDGE Project, Inc. grant proposal:

1. Increase the overall proportion of youth indicating their intent to remain sexually abstinent until marriage immediately following program, at 6 months, and at 12 months post program.
  - ❖ Post-test responses: 75% of all program participants plan to abstain from sexual activity until marriage (9% increase from pre- to post-test). Follow-up data has not yet been collected from program participants.
2. Increase the proportion of youth who indicate a decision to be abstinent until marriage among program participants who were previously sexually active immediately following program, at 6 months, and at 12 months post program.
  - ❖ Post-test responses: 37% of participants who reported they had previously been sexually active plan to renew their commitment to virginity until marriage (15% increase from pre- to post-test). Follow-up data has not yet been collected.
3. Increase the proportion of youth who have never had sex who remain abstinent immediately after the program, at 6 months, and at 12 months post program.

- ❖ Post-test responses: 85% of those reporting they have never engaged in sexual activity plan to abstain from sexual activity until marriage (8% increase from pre- to post-test). Follow-up data has not yet been collected.

To address the Federal Guidelines (A-H), the questionnaires were designed to measure the following issues. The survey results of each index are discussed in the following ten sections (complete survey results are included in Appendix A overall and by program, county, grade, sex, and race):

- ❖ Index A: Attitudes toward Sexual Abstinence until Marriage
- ❖ Index B: Intentions to Choose Sexual Abstinence until Marriage
- ❖ Index C: Attitudes toward Sexual Activity before Marriage
- ❖ Index D: Consequences of Teen Motherhood
- ❖ Index E: Other Risks and Consequences of Sexual Activity before Marriage
- ❖ Index F: Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs
- ❖ Index G: Ability to Reject Sexual Advances
- ❖ Index H: Participation in Risky Behaviors Involving Sexual Activity
- ❖ Index I: Participation in Risky Behaviors Involving Alcohol, Tobacco, and other Drug Use
- ❖ Index J: Intentions to Continue Alcohol, Tobacco, and other Drug Use

**Index A: Attitudes toward Sexual Abstinence until Marriage:** According to the overall t-test results of the *Attitudes toward Sexual Abstinence until Marriage* scale, a significant, positive change was observed from pre- to post-test (see Table 2 on the following page). Consequently, these results suggest that respondents showed a more positive attitude toward sexual abstinence until marriage after participating in the RIDGE Project. The observations of individual programs show positive changes from pre- to post-test for all five programs (i.e., increases in the means), although these changes were not statistically significant for Rites of Passage participants. Overall, the Cohen's *d* measure indicates there was a small effect size overall and at nearly all programs; which suggests the program had a small effect on students' attitudes toward sexual abstinence until marriage.

The *Attitudes toward Sexual Abstinence until Marriage* scale was created from participants' responses to the following<sup>1</sup>:

- ❖ It is important to be married before I have sex.
- ❖ Remaining abstinent until marriage shows respect for myself.
- ❖ Abstinence until marriage is the healthiest choice for any person, especially teens.
- ❖ By waiting until marriage to be sexually active, I may be better able to reach my life goals.
- ❖ I know that saving sex until marriage is the best choice.

---

<sup>1</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, [Pages 1 through 10](#).

**Table 2. T-test and effect size results for the *Attitudes toward Sexual Abstinence until Marriage* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>2,531</b>	<b>21.035</b>	<b>22.299</b>	<b>-19.292</b>	<b>p ≤ .001</b>	<b>.300</b>
CARE Project	734	21.046	22.324	-10.104	p ≤ .001	.301
Project REACH	123	19.130	21.073	-5.852	p ≤ .001	.407
Project Respect	1,356	21.312	22.594	-15.043	p ≤ .001	.321
Rites of Passage	109	19.560	19.982	-0.982	ns	.078
SolidSource	209	21.091	22.220	-5.898	p ≤ .001	.281

Survey results for each of the five agreement statements comprising the *Attitudes toward Sexual Abstinence until Marriage* scale are discussed below.

- ❖ According to post-test survey results, 85% of respondents agreed, “It is important to be married before I have sex.” (9% increase from pre- to post-test).
- ❖ On the post-test, 88% of the program participants agreed, “Remaining abstinent until marriage shows respect for myself.” (9% increase from pre- to post-test).
- ❖ The post-test survey results indicated 87% of the program participants agreed, “Abstinence until marriage is the healthiest choice for any person, especially teens.” (8% increase from pre- to post-test).
- ❖ According to the post-test responses, 89% of the program participants agreed, “By waiting until marriage to be sexually active, I may be better able to reach my life goals.” (8% increase from pre- to post-test).
- ❖ On the post-test, 87% of the program participants agreed, “I know that saving sex until marriage is the best choice.” (7% increase from pre- to post-test).

**Index B: Intentions to Choose Sexual Abstinence until Marriage:** Overall results from the t-test of the *Intentions to Choose Sexual Abstinence until Marriage* scale indicated a significant change from pre- to post-test (see Table 3 on the following page). Positive pre- to post-test changes were observed for all five programs, although the changes were not statistically significant for Rites of Passage respondents. According to Cohen’s *d*, the effect was small for the overall sample and for nearly all of the individual programs regarding intentions to choose sexual abstinence until marriage.

The *Intentions to Choose Sexual Abstinence until Marriage* scale was created from participants' responses to the following<sup>2</sup>:

- ❖ I plan to abstain from ALL sexual activity until marriage.
- ❖ I plan to renew my commitment to virginity until marriage.
- ❖ I have made a personal pledge to wait until marriage to have sex.
- ❖ I plan to abstain from sexual activity until marriage.

**Table 3. T-test and effect size results for the *Intentions to Choose Sexual Abstinence until Marriage* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>2,532</b>	<b>14.809</b>	<b>16.137</b>	<b>-20.082</b>	<b>p ≤ .001</b>	<b>.279</b>
CARE Project	735	14.788	16.336	-11.247	p ≤ .001	.328
Project REACH	123	12.138	13.748	-5.310	p ≤ .001	.308
Project Respect	1,356	15.239	16.580	-15.978	p ≤ .001	.295
Rites of Passage	109	12.541	13.028	-1.210	ns	.092
SolidSource	209	14.847	15.593	-4.160	p ≤ .001	.155

Survey results for each of the four agreement statements contained in the *Intentions to Choose Sexual Abstinence until Marriage* scale are discussed below.

- ❖ On the post-test, 72% of the program participants agreed, “I plan to abstain from ALL sexual activity until marriage.” (11% increase from pre- to post-test).
- ❖ According to the post-test responses, 71% of the program participants agreed, “I plan to renew my commitment to virginity until marriage.” (12% increase from pre- to post-test).
- ❖ On the post-test, 72% of the program participants agreed, “I have made a personal pledge to remain sexually abstinent until marriage.” (12% increase from pre- to post-test).
- ❖ The post-test indicated that 75% of the program participants agreed, “I plan to abstain from sexual activity until marriage.” (9% increase from pre- to post-test).

**Index C: Attitudes toward Sexual Activity before Marriage:** Table 4 on the following page shows the t-test results for *Attitudes toward Sexual Activity before Marriage* scale, indicating participants' responses improved significantly from pre- to post-test, overall and for participants in the CARE Project, Project REACH, and Project Respect. In addition, SolidSource participants experienced pre- to post-test improvements, although not statistically significant. Conversely, there was a small decrease from pre- to post-test for Rites of Passage participants. The effect size measure using

<sup>2</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 11 through 18.

Cohen’s *d* suggests participation in the program had a very small to small effect on students’ attitudes toward sexual activity before marriage.

The *Attitudes toward Sexual Activity before Marriage* scale was created from participants’ responses to the following<sup>3</sup>:

- ❖ It is okay to have sex with someone you love before you get married.
- ❖ The best way to avoid a pregnancy before marriage is to use contraceptives/condoms.
- ❖ Having sex before marriage will change my life.
- ❖ It is okay for me to be sexually active as long as I use contraceptives/condoms.
- ❖ If I had sexual intercourse now, it could affect my future marriage in a negative way.

**Table 4. T-test and effect size results for the *Attitudes toward Sexual Activity before Marriage* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen’s d
<b>Overall</b>	<b>2,532</b>	<b>17.270</b>	<b>17.702</b>	<b>-5.411</b>	<b>p ≤ .001</b>	<b>.110</b>
CARE Project	735	17.362	18.033	-4.550	p ≤ .001	.173
Project REACH	123	16.187	17.130	-2.375	p ≤ .01	.236
Project Respect	1,356	17.395	17.720	-2.992	p ≤ .01	.084
Rites of Passage	109	16.257	16.138	0.283	ns	.029
SolidSource	209	17.306	17.574	-1.061	ns	.069

Survey results for each of the five agreement statements composing the *Attitudes toward Sexual Activity before Marriage* scale are discussed below.

- ❖ On the post-test, 63% of the program participants disagreed with the statement, “It is okay to have sex with someone you love before you get married.” (11% increase from pre- to post-test in the desired response).
- ❖ On the post-test, 47% of the program participants disagreed with the statement, “The best way to avoid a pregnancy before marriage is to use contraceptives/condoms.” (17% increase from pre- to post-test in the desired response).
- ❖ The post-test survey results indicated 83% of the program participants agreed, “Having sex before marriage will change my life.” (13% increase from pre- to post-test).
- ❖ According to post-test responses, 66% of the program participants disagreed with the statement, “It is okay for me to be sexually active as long as I use contraceptives/condoms.” (12% increase from pre- to post-test in the desired response).

<sup>3</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, [Pages 19 through 28](#).

- ❖ According to the post-test responses, 84% of the program participants agreed, “If I had sexual intercourse now, it could affect my future marriage in a negative way.” (13% increase from pre- to post-test).

**Index D: Consequences of Teen Motherhood:** According to the overall t-test results of the summated *Consequences of Teen Motherhood* scale, a significant, positive change was observed from pre- to post-test (see Table 5). These findings suggest that participants gained knowledge about the consequences of teen motherhood from their participation in the RIDGE Project. The observations of individual programs show positive, statistically significant changes from pre- to post-test for CARE Project, Project REACH, Project Respect, and SolidSource; however, there was a slight decline from pre- to post-test for Rites of Passage, although not statistically significant. Overall, the Cohen’s *d* measure indicates there was a small effect size overall and at nearly all programs, suggesting the program had a small effect on students’ attitudes regarding consequences of teen motherhood.

The *Consequences of Teen Motherhood* scale was created from participants’ responses to the following <sup>4</sup>:

- ❖ Teenage mothers and their children often live in poverty.
- ❖ Teenage mothers are more likely to drop out of school.
- ❖ The best time to have a baby is when I am married.

**Table 5. T-test and effect size results for the *Consequences of Teen Motherhood* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen’s d
<b>Overall</b>	<b>2,532</b>	<b>12.200</b>	<b>12.874</b>	<b>-16.928</b>	<b>p ≤ .001</b>	<b>.346</b>
CARE Project	735	12.195	12.936	-9.345	p ≤ .001	.367
Project REACH	123	11.659	12.415	-5.238	p ≤ .001	.368
Project Respect	1,356	12.257	12.980	-14.170	p ≤ .001	.390
Rites of Passage	109	11.697	11.642	0.196	ns	.022
SolidSource	209	12.431	12.876	-3.646	p ≤ .001	.258

Survey results for each of the three agreement statements included in the *Consequences of Teen Motherhood* scale are discussed on the following page:

<sup>4</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 29 through 34.

- ❖ On the post-test, 68% of the program participants agreed, “Teenage mothers and their children often live in poverty.” (19% increase from pre- to post-test).
- ❖ According to the post-test responses, 86% of the program participants agreed, “Teenage mothers are more likely to drop out of school.” (5% increase from pre- to post-test).
- ❖ The post-test responses indicate that 95% of the program participants agreed, “The best time to have a baby is when I am married.” (2% increase from pre- to post-test).

**Index E: Other Risks and Consequences of Sexual Activity before Marriage:** Overall results from the t-test of the *Other Risks and Consequences of Sexual Activity before Marriage* scale indicated a significant change from pre- to post-test (see Table 6). Positive, statistically significant pre- to post-test changes were observed for CARE Project, Project REACH, Project Respect, and Solid Source; however, a very small pre- to post-test decline was noted for Rites of Passage. According to Cohen’s *d*, the effect was small for the overall sample, and ranged from very small to medium for the individual programs regarding other risks and consequences of sexual activity before marriage.

The *Other Risks and Consequences of Sexual Activity before Marriage* scale was created from participants’ responses to the following<sup>5</sup>:

- ❖ The best way to avoid an out-of-wedlock pregnancy is to wait until marriage to have sex.
- ❖ Teens can have sexually transmitted diseases (STDs) without even knowing it.
- ❖ Having sex outside of marriage can cause depression.
- ❖ The best way to avoid an STD is to wait until marriage to have sex.

**Table 6. T-test and effect size results for the *Other Risks and Consequences of Sexual Activity before Marriage* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen’s d
<b>Overall</b>	<b>2,532</b>	<b>16.991</b>	<b>18.204</b>	<b>-23.407</b>	<b>p ≤ .001</b>	<b>.467</b>
CARE Project	735	16.875	18.290	-13.228	p ≤ .001	.527
Project REACH	123	16.065	17.455	-6.197	p ≤ .001	.482
Project Respect	1,356	17.170	18.413	-19.034	p ≤ .001	.518
Rites of Passage	109	16.578	16.440	0.410	ns	.039
SolidSource	209	16.995	17.904	-6.436	p ≤ .001	.367

The survey results for each of the four agreement statements comprising the *Other Risks and Consequences of Sexual Activity before Marriage* scale are included on the following page.

<sup>5</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 35 through 42.

- ❖ The post-test responses indicate that 95% of the program participants agreed, “The best way to avoid an out-of-wedlock pregnancy is to wait until marriage to have sex.” (5% increase from pre- to post-test).
- ❖ On the post-test, 96% of the program participants agreed, “Teens can have sexually transmitted diseases (STDs) without even knowing it.” (3% increase from pre- to post-test).
- ❖ According to the post-test responses, 83% of the program participants agreed, “Having sex outside of marriage can cause depression.” (23% increase from pre- to post-test).
- ❖ The post-test responses indicate that 89% of the program participants agreed, “The best way to avoid an STD is to wait until marriage to have sex.” (11% increase from pre- to post-test).

**Index F: Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs:** Table 7 shows the t-test results for the *Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs* scale, indicating participants’ responses improved significantly from pre- to post-test overall and for the CARE Project, Project REACH, Project Respect, and SolidSource participants. Conversely, Rites of Passage participants had a slight decline from pre- to post-test. The effect size measure using Cohen’s *d* suggests participation in the program had a small to very small effect on participants concerning the risk of sexual activity after drinking alcohol and/or using drugs.

The *Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs* scale was created from participants’ responses to the following<sup>6</sup>:

- ❖ Being drunk or high makes it harder to abstain from sexual intercourse.
- ❖ Using alcohol and/or other drugs makes teens more likely to have sex.
- ❖ I can say ‘no’ to other risky behaviors such as alcohol and drug use.

**Table 7. T-test and effect size results for the *Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen’s d
<b>Overall</b>	<b>2,529</b>	<b>12.853</b>	<b>13.463</b>	<b>-14.584</b>	<b>p ≤ .001</b>	<b>.284</b>
CARE Project	733	12.950	13.555	-8.190	p ≤ .001	.282
Project REACH	123	12.390	12.976	-2.918	p ≤ .01	.228
Project Respect	1,355	12.861	13.545	-12.147	p ≤ .001	.327
Rites of Passage	109	12.395	12.385	0.032	ns	.037
SolidSource	209	12.967	13.464	-3.505	p ≤ .001	.268

<sup>6</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 43 through 48.

The survey results for each of the three agreement statements covered in the *Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs* scale are discussed below.

- ❖ On the post-test, 88% of the program participants agreed, “Being drunk or high makes it harder to abstain from sexual intercourse.” (11% increase from pre- to post-test).
- ❖ According to the post-test survey responses, 91% of the program participants agreed, “Using alcohol and/or other drugs makes teens more likely to have sex.” (8% increase from pre- to post-test).
- ❖ The post-test responses indicate that 91% of the program participants agreed, “I can say ‘no’ to other risky behaviors such as alcohol and drug use.” (3% increase from pre- to post-test).

**Index G: Ability to Reject Sexual Advances:** According to the overall t-test results of the *Ability to Reject Sexual Advances* scale, a significant, positive change was observed from pre- to post-test (see Table 8 on the following page). These findings suggest that participants gained knowledge and skills regarding their ability to reject sexual advances from their participation in the RIDGE Project. The observations of individual programs show positive, statistically significant changes from pre- to post-test for CARE Project, Project REACH, Project Respect, and SolidSource; however, there was a slight decline from pre- to post-test for Rites of Passage, although not statistically significant. Overall, the Cohen’s *d* measure indicates there was a very small effect size overall and at nearly all programs, suggesting the program had a very small to small effect on students’ ability to reject sexual advances.

The *Ability to Reject Sexual Advances* scale was created from participants’ responses to the following<sup>7</sup>:

- ❖ I have the ability to say ‘no’ if someone tries to talk me into having sex.
- ❖ Saying ‘no’ to sex as a teen can help me reach my goals as an adult.
- ❖ It is my responsibility to set limits on relationships I am involved in.
- ❖ I have the willpower to say ‘no’ to sex.

---

<sup>7</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, [Pages 49 through 56](#).

**Table 8. T-test and effect size results for the *Ability to Reject Sexual Advances* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>2,532</b>	<b>17.765</b>	<b>18.239</b>	<b>-10.191</b>	<b>p ≤ .001</b>	<b>.168</b>
CARE Project	735	17.950	18.378	-4.545	p ≤ .001	.165
Project REACH	123	16.837	17.236	-1.951	p ≤ .05	.116
Project Respect	1,356	17.856	18.400	-9.281	p ≤ .001	.201
Rites of Passage	109	16.468	16.385	0.262	ns	.020
SolidSource	209	17.751	18.258	-3.556	p ≤ .001	.181

The survey results for each of the four agreement statements regarding respondents' ability to reject sexual advances are discussed below.

- ❖ On the post-test, 92% of the program participants agreed, "I have the ability to say 'no' if someone tries to talk me into having sex." (3% increase from pre- to post-test).
- ❖ According to the post-test responses, 90% of the participants agreed, "Saying 'no' to sex as a teen can help me reach my goals as an adult." (6% increase from pre- to post-test).
- ❖ On the post-test, 92% of the program participants agreed, "It is my responsibility to set limits on relationships I am involved in." (2% increase from pre- to post-test).
- ❖ The post-test indicated that 89% of the program participants agreed, "I have the willpower to say 'no' to sex." (5% increase from pre- to post-test).

**Index H: Participation in Risky Behaviors Involving Sexual Activity:** The survey results for the *Participation in Risky Behaviors Involving Sexual Activity* scale show almost no change (i.e., no change to a very slight increase) from pre- to post-test overall and for all five individual programs (see Table 9 on the following page). In addition, the effect size scores indicate a very small effect size overall and for all five programs.

The *Participation in Risky Behaviors Involving Sexual Activity* scale was created from participant responses to the following<sup>8</sup>:

- ❖ Have you ever been sexually active?
- ❖ Have you been sexually active in the past six months?
- ❖ Have you ever been pregnant or gotten someone pregnant?

<sup>8</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 57 through 62.

**Table 9. T-test and effect size results for the *Participation in Risky Behaviors Involving Sexual Activity* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>2,426</b>	<b>3.612</b>	<b>3.601</b>	<b>1.020</b>	<b>ns</b>	<b>.013</b>
CARE Project	699	3.637	3.628	0.442	ns	.011
Project REACH	117	3.222	3.205	0.294	ns	.016
Project Respect	1,301	3.674	3.663	0.961	ns	.015
Rites of Passage	101	3.040	3.040	0.000	ns	.000
SolidSource	209	3.635	3.620	0.360	ns	.018

The survey results for each of the three questions regarding participation in sexual activity are discussed below.

- ❖ According to the survey responses, approximately 20% of participants reported they have been sexually active on both the pre- and post-test.
- ❖ Approximately 15% of both pre- and post-test participants reported they have been sexually active in the past six months.
- ❖ On both the pre- and post-test, about 2% of the respondents indicated they had been pregnant or gotten someone else pregnant (slight increase was noted from pre- to post-test).

**Index I: Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use:** Table 10 on the following page shows the t-test results for *Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use* scale, indicating alcohol, tobacco, and other drug use *decreased* significantly from pre- to post-test overall and for Project Respect participants. In addition, there were slight declines in reported substance use by CARE Program and SolidSource participants. Conversely, Project REACH and Rites of Passage participants had a slight increase in reported substance use from pre- to post-test. The effect size measure using Cohen's *d* suggests program participation had a very small effect on participants' alcohol, tobacco, and other drug use.

The *Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use* scale was created from participant responses to the following <sup>9</sup>:

- ❖ Have you ever used any tobacco products?
- ❖ Have you ever drunk alcohol, such as beer, wine, or liquor (not just a sip or taste of some else's drink)?
- ❖ Have you ever used any illegal drugs?

<sup>9</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, [Pages 63 through 68](#).

**Table 10. T-test and effect size results for the *Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>2,472</b>	<b>2.411</b>	<b>2.430</b>	<b>-1.994</b>	<b>p ≤ .05</b>	<b>.020</b>
CARE Project	712	2.473	2.503	-1.580	ns	.031
Project REACH	121	1.942	1.876	1.110	ns	.058
Project Respect	1,327	2.482	2.512	-2.593	p ≤ .01	.034
Rites of Passage	105	1.600	1.533	0.961	ns	.053
SolidSource	207	2.430	2.435	-0.146	ns	.005

Survey results for each of the questions regarding respondents' substance use are discussed below.

- ❖ According to the survey responses, there was a slight decrease from pre- to post-test in the number of respondents who reported they have used any tobacco products (approximately 18% of pre-test respondents and 17% of post-test respondents).
- ❖ More than 30% of pre-test participants reported they have drunk alcohol, compared to less than 29% of post-test respondents.
- ❖ On both the pre- and post-test, about 10% of the respondents indicated they have used any illegal drugs (a slight decline was noted from pre- to post-test).

**Index J: Intentions to Continue Alcohol, Tobacco, and Other Drug Use:** According to Table 11 on the following page, t-test results for the *Intentions to Continue Alcohol, Tobacco, and Other Drug Use* scale shows a slight decline from pre- to post-test in participants' intentions to continue substance use (for those who indicated they had used tobacco products, drank alcohol, or used illegal drugs in the past year) overall and for the CARE Project, and a statistically significant decrease for Project REACH. However, there were slight increases (not statistically significant) regarding intentions to continue substance use by Project Respect and SolidSource participants. In addition, there was no change from pre- to post-test for Rites of Passage participants. The effect size measure using Cohen's *d* suggests participation in the program had a small to very small effect on participants' alcohol, tobacco, and other drug use.

The *Intentions to Continue Alcohol, Tobacco, and Other Drug Use* scale was constructed from participant responses to the following questions<sup>10</sup>:

- ❖ Do you plan to continue to use tobacco products?
- ❖ Do you plan to continue to drink alcohol?
- ❖ Do you plan to continue to use any illegal drugs?

**Table 11. T-test and effect size results for the *Intentions to Continue Alcohol, Tobacco, and Other Drug Use* scale**

	n	Pre-test mean	Post-test mean	t	p	Cohen's d
<b>Overall</b>	<b>654</b>	<b>1.054</b>	<b>1.058</b>	<b>-0.161</b>	<b>ns</b>	<b>.005</b>
CARE Project	161	1.099	1.118	-0.301	ns	.020
Project REACH	59	0.932	1.153	-1.752	p ≤ .05	.246
Project Respect	330	1.012	0.994	0.530	ns	.021
Rites of Passage	59	1.237	1.237	0.000	ns	.000
SolidSource	45	1.111	0.956	1.479	ns	.169

The survey results for each of the three questions regarding respondents' intentions to continue alcohol, tobacco, and other drug use are discussed below:

- ❖ According to the survey responses, there was a slight increase from pre- to post-test in the number of respondents who reported they plan to continue using tobacco products (approximately 37% of both pre- and post-test respondents).
- ❖ There was a slight decrease from pre- to post-test in the number of respondents who indicated they intend to continue to drink alcohol (50% of pre-test respondents compared to less than 49% of post-test respondents).
- ❖ A decline from pre- to post-test was observed in the number of students who reported they intend to continue using illegal drugs (36% of pre-test respondents compared to less than 34% of post-test respondents).

<sup>10</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 69 through 74.

**Other Survey Results:** Table 12 includes other survey agreement statements that were not included in the indexes to measure the Federal Guidelines. From pre- to post-test, there were increases for all three survey items <sup>11</sup>:

**Table 12. Other Survey Items**

	n	Pre-test Mean	Post-test Mean
It can be against the law to have sex with someone younger than age 16.	2,509	3.883	4.180
Even if you have already had sex, you can choose to save sex for marriage only.	2,507	3.798	4.208
Have you ever been diagnosed with a sexually transmitted disease (STD)?	2,448	0.992	0.993

- ❖ The post-test responses indicated 71% of the program participants agreed, “It can be against the law to have sex with someone younger than age 16.” (11% increase from pre- to post-test).
- ❖ According to the results, 78% of post-test respondents agreed, “Even if you have already had sex, you can choose to save sex for marriage only.” (15% increase from pre- to post-test).
- ❖ On both the pre- and post-test, less than 1% of the respondents indicated they have been diagnosed with a sexually transmitted disease.

**Abstinence Messages:** On the pre-test, participants were asked if they had seen or heard any messages about sexual abstinence within the past six months (complete results are included in Appendix A, Page 81). Overall, 76% reported they had seen or heard such a message. Table 13 contains the various types of media followed by the percentage of respondents (in descending order) who indicated exposure to the message.

**Table 13. Media Exposure to Abstinence Messages**

Media Type	Percentage of Pre-test Responses	Media Type	Percentage of Pre-test Responses
Television	46.8%	Radio	16.5%
School	46.4%	Poster	14.0%
Parent	25.6%	Billboard	12.1%
Church	21.4%	Sibling	9.8%
Friend	21.3%	Newspaper	8.4%
Magazine	20.8%	Brochure	7.9%
Website	17.2%	Other	6.5%

<sup>11</sup> Descriptive statistics for the individual questions comprising this index are contained in Appendix A, Pages 75 through 80.

**Program Evaluation:** On the post-test, nearly 91% of the respondents agreed with the statement, “This program helped me understand the consequences of sex outside marriage.” (Complete results are included in Appendix A, Page 82).

**Additional Comments:** On the post-test, students were given the opportunity to provide additional comments. The following includes the top five comments made by students (for the complete set of comments, consult Appendix B):

- ❖ Participants learned a lot and found the sessions to be very informative.
- ❖ Students thought the programs very helpful to them and other youth.
- ❖ Students realized the importance of abstinence until marriage and made that commitment.
- ❖ Students appreciated the instructors’ efforts and wanted them to return to their schools and continue their work.
- ❖ Students enjoyed participating in the sessions and had fun doing the activities.

**Other Program Objectives:** In addition to the goals and objectives regarding abstinence education, the following eight objectives were listed in the RIDGE Project grant proposal. The RIDGE Project staff reported progress toward the on the following eight program objectives:

**Objective 1:** Enroll students ages 12 to 18 in curriculum-based abstinence education programs (Each of the 163 schools may choose which of the approved curricula best meets their individual needs. We will provide any of the following: *Choosing the Best*, *Game Plan*, *Navigator*, *Relationships Under Construction*, or *RSVP*).

- ❖ *Choosing the Best*, *Game Plan*, *Navigator*, *Relationships Under Construction*, and *RSVP* were made available for programming at 117 schools; however, three schools that were originally projected to receive services were unable to be served for reasons of weather and scheduling conflicts.

**Objective 2:** Provide abstinence education to 32,188 students in the 15-county area during and after school.

- ❖ A total of 26,514 students (ages 12 to 18) in all 15 counties were served with in-school and after-school programming.

**Objective 3:** Provide 15 professional trainings (to reach 300 professionals).

- ❖ Fifteen (15) professional trainings have been or will be completed by September 29, 2008.

**Objective 4:** Empower local youth coalitions throughout the state by developing and expanding the statewide Youth Congress with three meetings.

- ❖ The Ohio Youth Congress had more than 52 participants in the three meetings.

**Objective 5:** Provide parent and community member events/education (to reach 4,000 parents).

- ❖ During the program year, 14 parent events were hosted.

**Objective 6:** Target at-risk youth with mentoring and intensive abstinence programming in-school and after-school (to reach 350 students).

- ❖ The Adopt-a-Student Program, as well as the Heartbeat and ROP in-school programs, covered at-risk population both at public high schools and area Juvenile Detention Centers.

**Objective 7:** Expand the Hispanic Abstinence Education Outreach with youth leadership development component.

- ❖ Participation in events at local migrant camps and Hispanic festivals increased awareness of the RIDGE Project programs within the Hispanic community.

**Objective 8:** Increase community awareness and knowledge through media, events, and distribution of informational/educational materials.

- ❖ Four community events were held throughout the year, more than three news articles ran in area newspapers, and public service announcements (PSA) aired on cable stations in a four-county area. In addition, flyers, tickets, press releases, and a radio PSA were used in advertising for a youth event that included organizational information. During the program year, informational and educational materials were distributed through more than 15 information booths.

In summary, the RIDGE Project achieved six of the eight program objectives listed in their grant proposal. The two objectives that were not achieved involved the number of schools in which programming would be provided and the number of students that staff projected they would reach.

## CONCLUSIONS AND RECOMMENDATIONS

---

**Conclusions:** Overall, the survey results indicate that participants in the RIDGE Project experienced positive changes in knowledge, attitudes, and intended behaviors. T-test results showed statistically significant increases from pre- to post-in the following scales, while the Cohen's *d* scores suggest the program had a small effect on program participants in the following areas:

- ❖ Attitudes toward Sexual Abstinence until Marriage  
( $p \leq .001$ , Cohen's  $d = .30$ )
- ❖ Intentions to Choose Sexual Abstinence until Marriage  
( $p \leq .001$ , Cohen's  $d = .28$ )
- ❖ Attitudes toward Sexual Activity before Marriage  
( $p \leq .001$ , Cohen's  $d = .11$ )
- ❖ Consequences of Teen Motherhood  
( $p \leq .001$ , Cohen's  $d = .35$ )
- ❖ Other Risks and Consequences of Sexual Activity before Marriage  
( $p \leq .001$ , Cohen's  $d = .47$ )
- ❖ Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs  
( $p \leq .001$ , Cohen's  $d = .28$ )
- ❖ Ability to Reject Sexual Advances  
( $p \leq .001$ , Cohen's  $d = .17$ )

Overall, t-test results indicate there was little change from pre- to post-test and the Cohen's *d* score suggests the program had little to no effect on the following:

- ❖ Participation in Risky Behaviors Involving Alcohol, Tobacco, and Other Drug Use  
( $p \leq .05$ , Cohen's  $d = .02$ )
- ❖ Participation in Risky Behaviors Involving Sexual Activity  
(Cohen's  $d = .01$ )
- ❖ Intentions to Continue Alcohol, Tobacco, and Other Drug Use  
(Cohen's  $d = .01$ )

Regarding intentions to remain sexually abstinent until marriage, the survey results suggest that participation in the RIDGE Project programming had a positive effect on the short-term outcomes regarding the above components of the abstinence education initiative. On the post-test, 75% of all program participants indicated they plan to abstain from sexual activity until marriage, which is a 9% increase from pre- to post-test. In addition, 37% of post-test respondents who reported they had previously been sexually active reported they plan to renew their commitment to virginity until marriage, which is a 15% increase from pre- to post-test. Also, 85% of those reporting they have never engaged in sexual activity on the post-test said they plan to abstain from sexual activity until marriage, which is an 8% increase from pre- to post-test.

The survey results also suggest that respondents benefited from their participation in the program in the following ways:

- ❖ More positive attitudes toward sexual abstinence until marriage.
- ❖ Greater knowledge of the consequences of teen motherhood.
- ❖ Increased knowledge of the other risks and consequences of having sex before marriage.
- ❖ Greater awareness of the risk of sexual activity after drinking alcohol and/or using drugs.
- ❖ Increased ability to reject sexual advances.

Nearly all of the program participants recognized the benefits of the RIDGE Project programming. On the post-test, 91% of the respondents agreed with the statement, “This program helped me understand the consequences of sex outside marriage.” According to their survey comments, participants found the sessions to be very informative, thought the program was helpful, realized the importance of abstinence until marriage, appreciated the instructors’ efforts, and enjoyed participating in the program activities.

Additionally, the RIDGE Project achieved six of the eight other program objectives listed in their grant proposal. The two objectives that were not achieved involved the number of schools in which programming would be provided and the number of students that staff projected they would reach.

**Recommendations:** After reviewing the evaluation results, program personnel should focus on the following recommendations to enhance the program (recommendations are bolded and italicized):

***Recommendation 1: Locate control schools to provide a more effective evaluation plan.*** Identify control schools or control groups and collect data from those students to compare to data collected from program participants. If control schools cannot be identified, work with evaluators to develop a plan to collect survey data from control groups within the schools in which programming is being provided.

***Recommendation 2: Develop a plan for collecting follow-up survey data and submit for evaluation to determine the long-term effects of programming.*** Work with schools and projects where programming is being provided to develop a plan for collecting follow-up survey data. The data should be collected from program participants at intervals of 6 months and 12 months following the conclusion of programming, then submitted for evaluation to determine the long-term effects of the RIDGE Project programming.

***Recommendation 3: Collect and submit data from all eight program providers.*** This year's evaluation was based on data submitted from five of the eight program providers, and none of the programs submitted data from all of the schools or groups they served. According to the RIDGE Project personnel, reasons for programs not collecting and submitting data included not having the evaluation instruments at the time the groups received service (i.e., early in the school year), not serving particular groups due to adverse weather or cancellation of the program by schools, teachers not following through with having students complete web-based pre- and post-test surveys, or not using the surveys for some groups (i.e., youth receiving only one-day presentations or assemblies and 6<sup>th</sup> grade students). To effectively evaluate the RIDGE Project overall, data should be collected and submitted by all eight program providers. Due to pre- and post-test surveys being received that could not be matched, program providers need to make sure they collect pre- and post-test data from the same groups. To ensure proper documentation, program providers should also make sure surveys for each group are placed in sealed envelopes with the program name, school, grade, and class clearly written on the envelope.

***Recommendation 4: Review and revise the sampling plan to include only schools and other groups that will receive services and be completing pre- and post-test surveys.*** The RIDGE Project personnel should have their collaborators determine which schools and other groups will be receiving services, then work with the evaluator to revise the sampling plan. Any schools or groups that will not be completing pre- and post-test surveys should be documented so they can be excluded from the sampling plan. In addition, the RIDGE Project personnel should keep the evaluators updated of any schedule changes, cancellations, or any other extenuating circumstances regarding the program schedule.

***Recommendation 5: Review the evaluation results and revise survey instruments to accurately measure topics covered in the RIDGE Project programming.*** The staff should work closely with the evaluator to revise current survey instruments to effectively measure items related to abstinence until marriage education that are being covered in the RIDGE Project programs.

The RIDGE Project - Classroom Presentation

## **APPENDIX B: THE RIDGE PROJECT SURVEY COMMENTS**

---

## **The RIDGE Project Survey Comments 2007-2008**

### **Sixth Grade Students:**

- ❖ Your program is cool.
- ❖ I found out sex is really bad.
- ❖ Thank you for teaching me about sex and how to say 'no' to sex until marriage.

### **Seventh Grade Students:**

- ❖ Thanks for teaching us.
- ❖ Thank you for reminding me!
- ❖ This all was a little scary (like the facts), but you guys were fun!
- ❖ Thanks for teaching me about these things.
- ❖ This is a good program and I learned a lot.
- ❖ Thank you!
- ❖ Thanks for teaching me to be abstinent. Although I knew and promised to stay abstinent until marriage, I now feel confident in my choice.
- ❖ I'm glad you talked about the consequences of having sex before marriage. It helped me learn to wait to have sex until I am married.
- ❖ I think that saving sex for marriage is the right thing.
- ❖ I learned about the consequences of sex, like STDs.
- ❖ I think it is good that they told us that you can get STDs just by touching, too.
- ❖ Thank you. The teachers were great.
- ❖ I liked playing the games.
- ❖ This is a great program. I learned a lot. Thank you!
- ❖ It's a good program.
- ❖ It really made me think of sex in a serious way.
- ❖ I like the program.
- ❖ This has been a help to me.
- ❖ I think this program is very beneficial to all kids.
- ❖ This program helped me understand all the consequences of having sex before marriage.
- ❖ I think this program does help students who aren't sure about some things.
- ❖ I feel this program is beneficial to all young teenagers.
- ❖ I think that this is a great program and it will help many teens to stay sexually abstinent until marriage.
- ❖ It helps to abstain from sex, alcohol, and other drugs that can be harmful to you.
- ❖ This program helped me not to have sex outside of marriage, plus it helped me not to do any drugs either. Thank you!
- ❖ It helped me to learn not to have sexual activities until marriage.
- ❖ This program taught me a lot.
- ❖ This helped me learn about the bad things about sex.

- ❖ I enjoyed the program, but here are some things to consider: Mothers who give up their children up for adoption often feel as though they have given up a part of themselves. Not all teen mothers are in poverty, often their parents help.
- ❖ I really think this program is beneficial because it really shows me what could happen to me. I liked it when you showed us the pictures of people with STDs because I really don't want that to happen to me.
- ❖ I think that this is a good program. It has made me think differently about what I will be up against for the rest of my life.
- ❖ It is a good program, but they are very opinionated. Like if you have sex, you will get an STD and you will die, almost like it is the end of the world.
- ❖ This program is excellent. They show how sex has its consequences.
- ❖ This was a great and fun program.
- ❖ I really thought that the information given was very important.
- ❖ I like it because it told us more about condoms, sex, and safe sex. I think this is a good program.
- ❖ I like this program a lot because it showed me all the different things that can happen to teens, like teen pregnancy.
- ❖ This is a good survey.
- ❖ This is a good program because you see the risks and what might happen.
- ❖ I think this is a good program because it teaches kids and teens to abstain from sex and the consequences of sex and drugs.
- ❖ It can help people not have sex until marriage.
- ❖ I have drunk a whole can of beer that my dad gave me. When I was young, I smoked because my mom was doing it and so I thought I could do it, too.
- ❖ I think that this is a very good program and Mrs. Pohler is awesome.
- ❖ You guys have a wonderful program. I think you should keep going and spread the truth to teens.
- ❖ After this CARE program, I learned that having a boyfriend and his thinking about sex is not a good thing for a girl. I liked this program! It taught me about consequences.
- ❖ I like this program because it helps kids who are being sexually active see what major consequences can affect their lives.
- ❖ I think this is a good place to confess and renew my commitment not to be sexually active and wait until marriage to have sex.
- ❖ I thank the RIDGE program for helping me make wise decisions.
- ❖ This group rocks.
- ❖ It taught me to not drink.
- ❖ Your program taught me that sex is bad.
- ❖ Thanks for teaching us.
- ❖ I plan to wait to have sex...definitely!
- ❖ Thanks so much for teaching me the consequences of having sex outside marriage.
- ❖ Sex outside marriage is bad.
- ❖ I liked the class and the teacher.
- ❖ The speaker was excellent.
- ❖ Everything was good.
- ❖ This is a good program.
- ❖ I really liked the activities we did in class.

- ❖ This program was very informative.
- ❖ Thanks for helping to choose to abstain from sex till marriage.
- ❖ I think it helped some people to realize what they're getting into.
- ❖ I think you do not have to get married in order to have kids.
- ❖ It was a very exciting experience.
- ❖ I always hear about the people who didn't get anything from having sex. It is no big deal to have sex as long as you are safe.
- ❖ It really helped me learn about STDs.
- ❖ I learned a lot.
- ❖ This program is a great way to show teens the dangers of having sex outside marriage.
- ❖ This is a good program.
- ❖ This program was just a way to scare us out of having premarital sex. I am sure people reading this had sex before marriage.
- ❖ I learned a lot.
- ❖ I like the activities; it is a fun way to learn things.
- ❖ This helped me to understand more about the negative things about sex.
- ❖ I liked the way you showed kids about all of the consequences of having sex before marriage.
- ❖ I plan to go and finish college as a physical therapist and play college softball.
- ❖ I learned so much.
- ❖ The program made sense and the people made it easy to be open and honest.
- ❖ Now I am positive of all of the consequences. You helped me so much.
- ❖ Thank you for taking your time and patience and teaching me and everyone else about sex.
- ❖ If you have pictures of genital infections, it will help kids not to have sex.
- ❖ This is the most respectful part of my body and life.
- ❖ She was a nice teacher.
- ❖ Thank you for taking your time to teach me these important facts.
- ❖ I really liked it and I hope she comes back.
- ❖ The teacher was really fun and made learning fun.
- ❖ I love the teacher. She taught me a lot about sex and how to stay abstinent.
- ❖ This program taught me a lot.
- ❖ I was planning to have sex before marriage, but as of right now, I am not completely sure. I hope to stay abstain.
- ❖ This program is a very good program and helped me to learn the consequences of sex.
- ❖ I know I should wait until marriage to have sex, definitely.
- ❖ The teacher was a wonderful, loving, caring, and did a great job explaining sex.
- ❖ I liked it. It was fun, but taught me a lot.
- ❖ Thanks for teaching us this week.
- ❖ This is a very helpful program. Keep up the great work.
- ❖ Thank you for taking time to talk to my school.
- ❖ Thanks for the lesson stating that sex before marriage is a bad idea.
- ❖ This program will help me make wiser decisions in the future.
- ❖ I think this program is great and I am saving sex until marriage!
- ❖ I'm glad we had this class! I learned a lot!
- ❖ I learned that I am worth waiting for.
- ❖ Thanks for this program!

- ❖ Do condoms actually work or are they a rip-off?
- ❖ This program is the best.
- ❖ This program is really great. I learned a lot.
- ❖ I really liked this program. I learned a lot of things that I didn't know.
- ❖ Thanks for coming! This program helped me with my life. The STD pictures were gross, but that will make me stay abstinent!
- ❖ Thanks for this program. It helped me understand things better.
- ❖ This is a great program!
- ❖ I'm not having sex until marriage because those STDs are gross and scary.
- ❖ I'm not having sex until marriage because I don't want STDs.
- ❖ I enjoyed this class.
- ❖ Thanks. This is a great program.
- ❖ Thanks for this program.
- ❖ I am glad that I had this class. Now I know the consequences of these actions.
- ❖ This program rocks!
- ❖ All of the speakers were nice, it was fun, and I learned a lot.
- ❖ Thank you!
- ❖ This was a good program.
- ❖ The teachers were funny.
- ❖ I already knew about the consequences of having sex before marriage.
- ❖ My two sisters have kids and everyone tells me I'm going to end up like them, but I'm not. I hang out with my boyfriend and all we do is hold hands and talk about life. We haven't done stuff like that and we won't.
- ❖ Some of these questions are none of your business.
- ❖ Thank you for teaching me this stuff!
- ❖ I liked the program.
- ❖ This program really helped me.
- ❖ I think it is a good thing to teach us.
- ❖ This program taught me ways to stay abstinent from sex before marriage in a good way.
- ❖ I got a lot from all of it.
- ❖ It helped me to know things I did not even think were possible.
- ❖ Thanks for the help.
- ❖ This program really helped me understand the consequences of sex, drugs, and everything else that was talked about. Some stuff I didn't even know was true! This program really helped me understand why to save sex for marriage.
- ❖ It taught me a lot of things.
- ❖ I think this is a really great program.
- ❖ I thought that this program was very good and it was fun.
- ❖ Keep doing what you are doing because it will help other teens make better choices about their future.
- ❖ I remember Stephanie when she taught my scrapbooking class for probation! Peace out, homie g skillet!
- ❖ This program helped me think about the consequences of having sex before marriage and that STDs like to live in warm dark moist places. The teacher is very considerate.
- ❖ I think this is very good program to teach young adults. They need to be more careful. Thank you.

- ❖ Why is it that hugging is the third step from sexual intercourse? Why is it that kissing and long kissing are before sexual intercourse?
- ❖ I really liked this program. It taught me a lot and now I know of even more things that can happen to you after you have sex.
- ❖ Mrs. Caldren is a really cool teacher. She taught us about sex and taught us in a fun way.
- ❖ I think that this is a good program. It has taught me how dangerous it is to have sex before marriage. Also, I learned that the long-term consequences of having sex are very bad.
- ❖ Mrs. Caldren is a good teacher.
- ❖ I have learned some new things and I'm glad I did. Now I learned more than I ever knew before.

### **Eighth Grade Students:**

- ❖ You should wait until marriage to have sex!
- ❖ Don't have sex!
- ❖ I think this program is really helpful to people and has given me a better understanding of why not to have sex.
- ❖ I thought this program was very fun and effective.
- ❖ The STD slides made me understand why having sex is very risky.
- ❖ It was great learning about STDs.
- ❖ There were gross pictures.
- ❖ I really enjoyed the program.
- ❖ I liked the games. The teacher did a good job.
- ❖ I loved it.
- ❖ You did a good job!
- ❖ I love not having sex!
- ❖ You did a good job, lady.
- ❖ Keep up the good work. It was helpful.
- ❖ This program was neat, totally keen.
- ❖ I honestly feel sex is okay if you're in college and you're really responsible. I recommend staying abstinent.
- ❖ Thanks.
- ❖ Thank you for coming in and sharing everything!
- ❖ Although this was a good program, most teens are smart enough to do what they think is right.
- ❖ Thank you.
- ❖ This program is very helpful in letting people know what can happen if you have sex outside of marriage.
- ❖ This program helped me better understand the consequences of having sex.
- ❖ Thanks, I really learned a lot I didn't already know.
- ❖ This program works.
- ❖ I think this would help many teens and pre-teens.
- ❖ It was helpful.
- ❖ I think that CARE helps students a lot!

- ❖ This program helped inform us of things we didn't know and makes us think more about our choices.
- ❖ It was good, but don't show those pictures because they are nasty.
- ❖ Sex outside of marriage causes a lot of things. I know from personal experience. I choose to abstain.
- ❖ I think this is a great program for teens. It opens our eyes and shows us the real consequences and explains things so we understand better.
- ❖ I think this program will work.
- ❖ I can't be completely sure because relationships are of no interest to me at the time. I think that education on abstinence in general is a good decision to be put in schools.
- ❖ This is a program that works great!
- ❖ This is a very effective and educational program. It has helped me a lot.
- ❖ It was good and funny.
- ❖ They should do this at a younger age because 8th grade is too old to start.
- ❖ Keep up the good work.
- ❖ I already know the stuff that happens.
- ❖ I will not have sex outside of marriage!
- ❖ I think that it works, but some kids still will not care.
- ❖ This was a very good program for us to learn about.
- ❖ I love the speaker. He is sweet and really cool.
- ❖ I love the speakers!
- ❖ It was interesting!
- ❖ Thank you for your time.
- ❖ I never will have sex or use drugs because I want to be happy when I get married.
- ❖ Thanks for coming to our school and talking about all the STDs.
- ❖ This is a great program.
- ❖ Why do you say condoms are good when they don't work?
- ❖ Thanks for a fun week.
- ❖ The teacher was very good.
- ❖ Thanks for coming and teaching us about sex.
- ❖ I already knew most of the stuff.
- ❖ Thank you for coming. You really helped me.
- ❖ I learned that sex is not a game.
- ❖ No sex for me until marriage.
- ❖ I was thinking about sex, but this program changed my thoughts on it.
- ❖ Can I get an STD if I have sex with a new boyfriend? Can I catch it if I use a condom?
- ❖ This was good information.
- ❖ I really enjoyed the program. It really helped me.
- ❖ Thank you for opening my eyes and making me think. I truly appreciate that.
- ❖ I will wait until I'm married to have sex.
- ❖ This program educated teens very well. I like this program.
- ❖ This is a stupid program. I learned this in one of my classes.
- ❖ The STD pictures and other things scared me!
- ❖ Would a divorce after sex cause depression?
- ❖ You did a great job teaching this program!
- ❖ Thanks for this program!

- ❖ This is a good program.
- ❖ Now that I know the consequences, I will wait until marriage to have sex.
- ❖ I'm glad you guys came to our school! I learned a lot!
- ❖ It was a wonderful learning experience. It will help me make better choices in the future.
- ❖ I think the instructors did a good job, and I won't be sexually active anymore because I might get herpes.
- ❖ Thanks for the help this program offered.
- ❖ I don't want my genitals to fall off.
- ❖ Thanks for sharing this program!
- ❖ I think the program was very effective.
- ❖ Alcohol and drug abuse were not portrayed as an instigator for premarital sex.
- ❖ This program changed my outlook on life.
- ❖ I learned just how important it is to save yourself for marriage and how to reduce the risks of STDs.
- ❖ I love sex education.
- ❖ Thanks for all of the things this program has taught me!
- ❖ This program was great!
- ❖ I learned to save myself for that special someone and not just give myself away.
- ❖ We learned about this last year in class.
- ❖ I thought this program was funny.
- ❖ Doing drugs and drinking alcohol do not affect a personal choice. It's the person's decision and nobody can change a personal decision other than that person.
- ❖ Thanks for this program!
- ❖ I thought this program was very educational and opened up my eyes to the risks associated with not saving sex until marriage.
- ❖ Thanks for this program!
- ❖ This program was educational and put things in perspective.
- ❖ Thanks for this program.
- ❖ Thanks, Mrs. Tyson, for teaching us right from wrong.
- ❖ I learned a lot about sex.
- ❖ I really enjoyed this program.
- ❖ This program helped me better understand a lot of things.
- ❖ It made us more aware and taught us how dangerous sex is to teens.
- ❖ Thank you for taking time to tell us how important abstinence until marriage is. I learned staying a virgin until marriage may be hard, but in the end it will be worth it.
- ❖ Thank you for coming.
- ❖ Thanks!
- ❖ Thanks.
- ❖ I liked all the speakers; they did a really good job.
- ❖ Thank you for coming to our school!
- ❖ Thank you for sharing the sex education.
- ❖ This test is pointless.
- ❖ Do more activities and talk less. Thanks for all the candy. Stephanie was great to talk to and discuss things with.
- ❖ It was kind of funny, but you need to like loosen up some. You were totally buggin' out about stuff, but other than that, it was pretty cool.

- ❖ This presentation was very educational and helped me understand more about sexual consequences. Thanks :)
- ❖ I really liked this program and definitely think it should be continued in our schools.
- ❖ It was fun.
- ❖ I think that this survey will help teens be honest and truthful to themselves and others.
- ❖ This gave me a more interactive way to learn about sex and STDs. This helped me learn more than just copying notes off the board. This class has opened my eyes and I'm glad I had the chance to take this class.
- ❖ I think that this was a really good class and I learned a lot.
- ❖ This program taught me that when you make decisions, they will most likely always affect someone else whether it be family, friends, your spouse, or even your children.
- ❖ This is so boring and I already knew everything on this test.
- ❖ I didn't really like the examples and we didn't get anything done. I already knew the information we learned in class.
- ❖ You should keep the program going because it makes teens realize the effects of sex before marriage.
- ❖ You could have explained things better and been a little less vague.

### **Ninth Grade Students:**

- ❖ This program taught me a lot so I can stay safe from STDs.
- ❖ This was a really great way of teaching kids to be safe. I learned a lot. I will try to set boundaries.
- ❖ It is a great program!
- ❖ This program is good because it helps kids learn. I'm pregnant right now and, believe me, I hate it. I'm glad that people can sit down and talk to kids.
- ❖ I'm glad you guys came in. I learned a lot and had fun at the same time! Thanks!
- ❖ Thanks for coming to my school!
- ❖ Thanks for coming to speak with us!
- ❖ I will not have sex until marriage!
- ❖ What a wonderful message!
- ❖ You did a good job and it was fun. I will definitely not have sex until marriage.
- ❖ These questions aren't good because what if you don't want to stay abstinent till marriage?
- ❖ It was a great learning experience.
- ❖ It is a great program that teaches kids the pros and cons of having sex before marriage.
- ❖ You guys did a wonderful job explaining the good and bad things.
- ❖ I think teens can make their own decisions. We know what is out there.
- ❖ I really liked the presentations. The speakers did great job.
- ❖ Sex is great and I do it every weekend.
- ❖ You did a great job. I enjoyed it more than all other talks we get.
- ❖ It made me think more seriously about my relationships.
- ❖ Thanks for coming.
- ❖ What you are doing is great.
- ❖ Our family doesn't really talk about sex and sex-related topics. I am very glad you came to our class and taught us these things.

- ❖ The teacher was great. She opened my eyes a little wider.
- ❖ It was a good program. Teens benefitted from it.
- ❖ This is so stupid.
- ❖ It was a great thing.
- ❖ I enjoyed learning about these things.
- ❖ Words can never explain my gratitude towards learning everything I learned.
- ❖ I learned a lot.
- ❖ It helps to know that you can always get yourself back on track, even you already made mistakes.
- ❖ I learned a lot in this class.
- ❖ Thanks for coming and teaching me some things I didn't know before.
- ❖ This was a good program.
- ❖ Thank you so much for helping me learn things I didn't know.
- ❖ I learned a lot in this class.
- ❖ I really liked learning about all this stuff for the past two weeks.
- ❖ This was a great learning experience.
- ❖ I learned more than I thought was out there.
- ❖ Sex is good when you are married.
- ❖ This program helped me understand that it is best to wait till marriage to have sex.
- ❖ I think this program really helped me to understand things.
- ❖ Some of these questions are hard to answer because I already have a daughter.
- ❖ Thank you for giving us all information that we need and can use in the future.
- ❖ Your program is extremely educational.
- ❖ This is a good program to lower the percentage of STDs and also lower the percentage of teens having sex.
- ❖ This is very informative and I am glad I got to learn about all this.
- ❖ I learned something new and how to handle myself.
- ❖ You should do this next year.
- ❖ I know that I don't want an STD, so I won't have sex.
- ❖ Even though I know what will happen, I don't have willpower to say 'no' to my boyfriend.
- ❖ This guy is really funny. He knows what he is doing.
- ❖ I am definitely abstaining from sex until marriage.
- ❖ I think program should last longer. The teachers were really fun and helped us with our problems.
- ❖ This helped me a lot, but now I am pregnant and still need to know everything.
- ❖ Thanks, Mario, you helped me and Zach with a lot of our friendship problems and schooling.
- ❖ This has helped me to know who to trust and understand when I am in an abusive relationship. Now I need to get out of one.
- ❖ This program had a big impact on me and will help me make better and wiser decisions in my life.
- ❖ You should not use the term "marriage" so much, because not everybody wants to get married.
- ❖ The speakers did a good job.
- ❖ I believe Project Respect has done a tremendous job.
- ❖ This program was fun.

- ❖ It was a fun week.
- ❖ The program helped me realize that is cool to wait until marriage to have sex.
- ❖ The presentations were really informative. I liked them a lot. I learned more about STDs and pregnancy.
- ❖ Thanks for coming in.
- ❖ Question 16 is complicated. If you haven't had sex yet, how can you renew your commitment?
- ❖ You provided great information.
- ❖ Yes, I want to thank the program speakers.
- ❖ Keep up the good work!
- ❖ This presentation has changed my views on this topic! Thank you!
- ❖ I don't like the moral things the program seems to talk about. It seems inappropriate for the speaker to talk about her opinions on abortion.
- ❖ I enjoyed the program. Keep doing it.
- ❖ I think this program is very effective.
- ❖ I thought the speakers did a good job.
- ❖ The speakers did a great job!
- ❖ You did a good job!

### **Tenth Grade Students:**

- ❖ It is my choice and I know what I do is my responsibility.
- ❖ The presenter was very good at giving me the facts about the consequences of having sex.
- ❖ I thought this was very informative. I would spend more time on how sex can affect guys.
- ❖ I like how you try to get to teens who have had sex to help them change before they end up getting worse.
- ❖ I have seriously thought about this and I will wait for marriage to have sex.
- ❖ This was helpful.
- ❖ Teach safe sex along with abstinence because teens will always have sex.
- ❖ You should try to make your speech less sexist.
- ❖ The speaker was excellent.
- ❖ I think this is good for some people because it encourages them to do what is best.
- ❖ I didn't know you could renew your virginity. I decided to make that choice.
- ❖ You did a great job. It had a positive influence on me.
- ❖ Thank you, teacher, you taught me a lot and possibly saved a part of me.
- ❖ Mary Anne Grady opened my eyes to a lot of different things.
- ❖ Mary Anne Grady is awesome.
- ❖ Don't stop doing this program. I hope it helps younger students.
- ❖ May the power of Christ complete you!!!!
- ❖ Mary Anne is a really helpful teacher. She makes class fun and not boring.
- ❖ The teacher was very funny.
- ❖ The teacher is amazing and she made me realize that I can start over. She changed my outlook on sex.
- ❖ Mary Anne is the most amazing person I've met. She has taught me everything I know, and I hope everything works out for her and everyone else.

- ❖ I am happy you came here.
- ❖ This program was really cool, but you need to give out more candy.
- ❖ Thanks for coming.
- ❖ Thanks. I am in a relationship, but this made a huge difference.
- ❖ This program helped me a lot.
- ❖ All the speakers were excellent. I really think they reached us.
- ❖ The teacher is hysterical. I loved the reality of it.
- ❖ You really encouraged me to stay abstinent.
- ❖ Julie Weber is awesome and fun. She taught me what I was worth.
- ❖ I really loved this program. It helped me through the toughest times in my life. I have learned to respect myself and care about what is happening in my life.
- ❖ I did not like the second woman because she was very stereotypical in assuming that all teenage relationships are sexual. Not true!!!
- ❖ I really liked the packet we did during the time you were here. I would like for you to come again.
- ❖ I'm not really active, just some mishaps.

#### **Eleventh Grade Students:**

- ❖ I liked the class.
- ❖ This is a good program!
- ❖ I made a choice - no more sex. So thanks.
- ❖ The teacher is an outstanding speaker. She makes it entertaining, not boring.
- ❖ I understand all of this and know the consequences, but that doesn't help me to stop doing it.

#### **Twelfth Grade Students:**

- ❖ Thanks so much. My boyfriend and I are having a baby and are getting married this summer. I talked to him about the thing you taught us, and we both thank you.
- ❖ The speakers of the program were very helpful and friendly.
- ❖ Thanks!
- ❖ Thank you!
- ❖ Mrs. Blakely is cool and deserves a raise.
- ❖ I like Sylvia much better than Troy.
- ❖ The presentations were very informative and answered many questions!
- ❖ I am a lesbian. I don't think I have the choice to wait until marriage.
- ❖ Thank you! I believe I will save myself for marriage.
- ❖ Not having sex will help me accomplish my goals.
- ❖ It was nice to be able to talk freely and gain trusted friends.
- ❖ Stephanie really helped me realize that I need to make my own decisions while knowing the risks.

## **APPENDIX C: THE RIDGE PROJECT SURVEY RELIABILITY TESTS**

---

**The RIDGE Project 2007-2008**  
**Reliability and Factor Analysis Results**

**Factor Loadings: Index A: Attitudes toward Sexual Abstinence until Marriage**

Variable	Factor Loading	
	Pre-test	Post-test
By waiting until marriage to be sexually active, I may be better able to reach my life goals.	.838	.872
Abstinence until marriage is the healthiest choice for any person, especially teens.	.820	.867
I know that saving sex until marriage is the best choice	.855	.863
It is important to be married before I have sex.	.800	.849
Remaining abstinent until marriage shows respect for myself.	.814	.839
	Alpha Coefficient:	.883
	Percent of Explained Variance:	68%
	Number of Cases:	2,467

**Factor Loadings: Index B: Intentions to Choose Sexual Abstinence until Marriage**

Variable	Factor Loading	
	Pre-test	Post-test
I plan to <u>abstain</u> from sexual activity until marriage.	.936	.939
I have made a personal pledge to remain sexually abstinent until marriage.	.918	.926
I plan to abstain from ALLsexual activity until marriage.	.910	.913
I plan to renew my commitment to virginity until marriage	.881	.889
	Alpha Coefficient:	.932
	Percent of Explained Variance:	83%
	Number of Cases:	2,441

**Factor Loadings: Index C: Attitudes toward Sexual Activity before Marriage**

Variable	Factor Loading	
	Pre-test	Post-test
It is okay for me to be sexually active as long as I use contraceptives/condoms.	.826	.830
It is okay to have sex with someone you love before you get married.	.794	.791
If I had sexual intercourse now, it could affect my future marriage in a negative way.	.723	.683
Having sex before marriage will change my life.	.667	.661
The best way to avoid a pregnancy before marriage is to use contraceptives/condoms.	.609	.632
Alpha Coefficient:	.774	.768
Percent of Explained Variance:	53%	52%
Number of Cases:	2,441	2,430

**Factor Loadings: Index D: Consequences of Teen Motherhood**

Variable	Factor Loading	
	Pre-test	Post-test
Teenage mothers are more likely to drop out of school.	.786	.836
Teenage mothers and their children often live in poverty.	.703	.765
The best time to have a baby is when I am married.	.619	.641
Alpha Coefficient:	.492	.609
Percent of Explained Variance:	50%	57%
Number of Cases:	2,482	2,483

**Factor Loadings: Index E: Other Risks and Consequences of Sexual Activity before Marriage**

Variable	Factor Loading	
	Pre-test	Post-test
The best way to avoid an STD is to wait until marriage to have sex.	.763	.795
The best way to avoid an out-of-wedlock pregnancy is to wait until marriage to have sex.	.712	.785
Having sex outside of marriage can cause depression.	.693	.740
Teens can have STDs without even knowing it.	.487	.671
Alpha Coefficient:	.586	.738
Percent of Explained Variance:	45%	56%
Number of Cases:	2,488	2,481

**Factor Loadings: Index F: Risk of Sexual Activity after Drinking Alcohol and/or Using Drugs**

Variable	Factor Loading	
	Pre-test	Post-test
Using alcohol and/or other drugs makes teens more likely to have sex.	.826	.836
Being drunk or high makes it harder to abstain from sexual intercourse.	.808	.824
I can say 'no' to other risky behaviors such as alcohol and drug use.	.496	.661
Alpha Coefficient:	.532	.668
Percent of Explained Variance:	53%	60%
Number of Cases:	2,497	2,469

**Factor Loadings: Index G: Ability to Reject Sexual Advances**

Variable	Factor Loading	
	Pre-test	Post-test
I have the willpower to say "no" to sex.	.827	.873
I have the ability to say "no" if someone tries to talk me into having sex.	.823	.855
It is my responsibility to set limits on relationships I am involved in.	.730	.797
Saying 'no' to sex as a teen can help me reach my goals as an adult.	.705	.751
Alpha Coefficient:	.774	.837
Percent of Explained Variance:	60%	67%
Number of Cases:	2,486	2,470

**Factor Loadings: Index H: Participation in Risky Behaviors (Sexual)**

Variable	Factor Loading	
	Pre-test	Post-test
Have you ever been sexually active?	.915	.928
Have you been sexually active in the past six months?	.928	.928
Have you ever been pregnant or gotten someone else pregnant?	.486	.514
Alpha Coefficient:	.696	.719
Percent of Explained Variance:	64%	66%
Number of Cases:	2,482	2,439

**Factor Loadings: Index I: Participation in Risky Behaviors (Alcohol, Tobacco, Drugs)**

Variable	Factor Loading	
	Pre-test	Post-test
Have you ever used any tobacco products?	.874	.878
Have you drunk alcohol, such as beer, wine, or liquor?	.834	.839
Have you used any illegal drugs?	.816	.824
Alpha Coefficient:	.793	.803
Percent of Explained Variance:	71%	72%
Number of Cases:	2,492	2,460

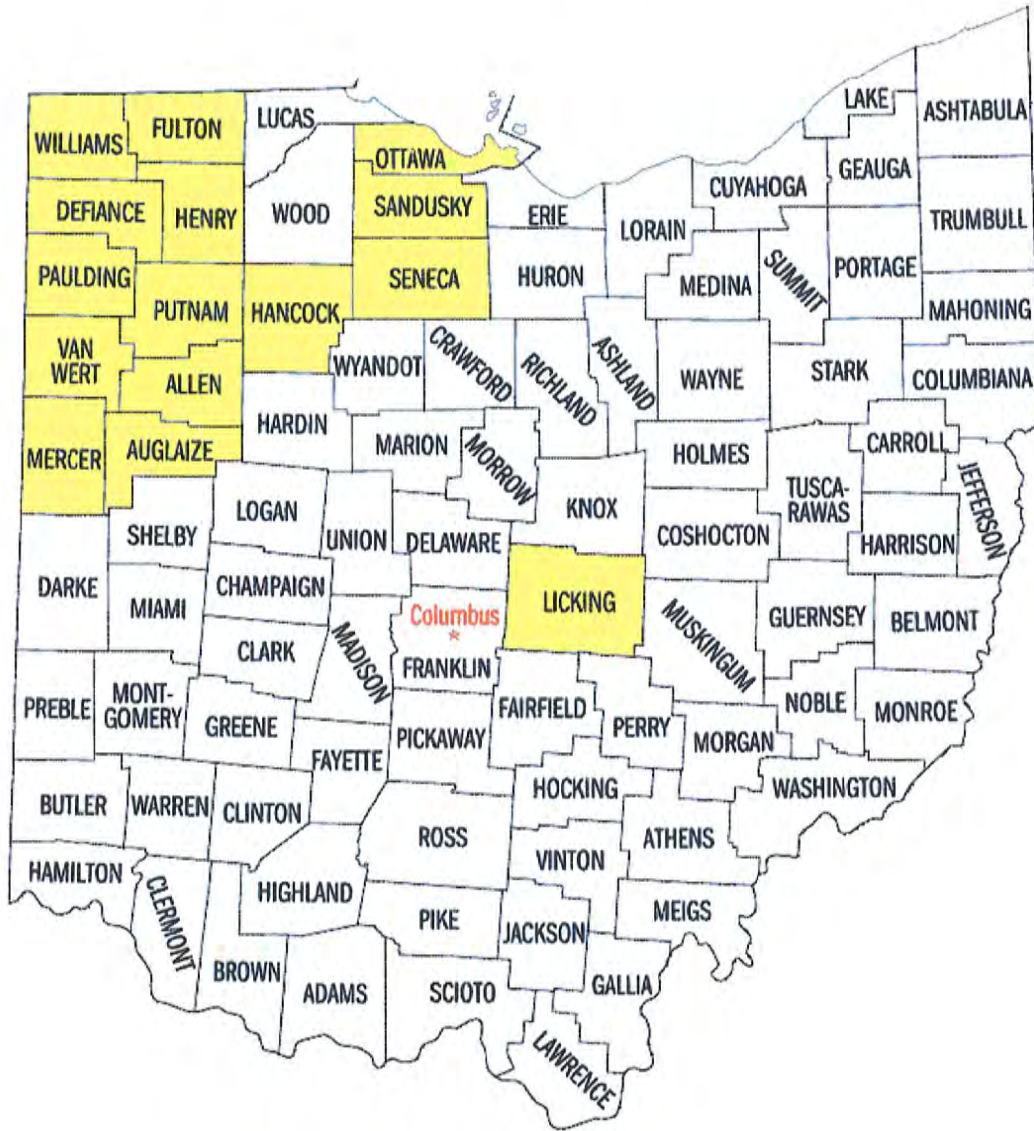

**Factor Loadings: Index J: Intentions to Continue Risky Behaviors (Alcohol, Tobacco, Drugs)**

Variable	Factor Loading	
	Pre-test	Post-test
Do you plan to continue to use tobacco products?	.767	.818
Do you plan to continue to drink alcohol?	.740	.764
Do you plan to continue to use any illegal drugs?	.792	.824
Alpha Coefficient:	.649	.723
Percent of Explained Variance:	59%	64%
Number of Cases:	211	206

- 7<sup>th</sup> – 12<sup>th</sup> Grade Classroom  
 Assembly

- ROP  
 Other \_\_\_\_\_

The RIDGE Project is interested in your opinions. Would you please take a few moments to complete this short survey? Your participation is voluntary, and you may stop at any time. Your survey responses will be treated completely confidentially, and will be used for evaluation purposes only. Do not include your name anywhere on this survey. We are interested in your honest opinions, so please mark the best answer for you.

Please remember....

- ☞ *DO NOT put your name on the survey*
- ☞ *There are no right or wrong answers*
- ☞ *Mark the answer that is the closest to how you feel*
- ☞ *Your teacher will not know how you answer questions*
- ☞ *Responses will only be reported for the group, not individuals*
- ☞ *Please do not talk to others during the survey*
- ☞ *If you are not sure of an answer, mark the 'Not Sure' box*
- ☞ *When you are finished, please turn in your survey*

If you have any questions concerning this survey, you may contact Dr. Robert Seufert, (513) 217-4306 at Miami University or Catherine Tijerina, (419) 782-1511 at the RIDGE Project. If you have any questions about your participation in this study, you can contact the Miami University Office for the Advancement of Research and Scholarship at (513) 529-3734.

-------------------------------	---

Please give us your **honest** opinion on each of the following statements. Remember, your answers are **completely confidential**.

	Yes Definitely	Yes Probably	Not Sure	No Probably Not	No Definitely Not
1. The best way to avoid an out-of-wedlock pregnancy is to wait until marriage to have sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2. I have the ability to say "no" if someone tries to talk me into having sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3. It is important to be married before I have sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4. Teenage mothers and their children often live in poverty.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5. I plan to abstain from ALL sexual activity until marriage.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
6. It is okay to have sex with someone you love before you get married.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7. The best way to avoid a pregnancy before marriage is to use contraceptives/condoms.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
8. Saying "no" to sex as a teen can help me reach my goals as an adult.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9. Having sex before marriage will change my life.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10. It is okay for me to be sexually active as long as I use contraceptives/condoms.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11. Remaining abstinent until marriage shows respect for myself.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12. Being drunk or high makes it harder to abstain from sexual intercourse.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13. If I had sexual intercourse now, it could affect my future marriage in a negative way.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
14. Abstinence until marriage is the healthiest choice for any person, especially teens.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
15. It can be against the law to have sex with someone younger than age 16.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
16. I plan to renew my commitment to virginity until marriage.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
17. Teens can have sexually transmitted diseases (STD's) without even knowing it.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
18. It is my responsibility to set limits on relationships I am involved in.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
19. Teenage mothers are more likely to drop out of school.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
20. By waiting until marriage to be sexually active, I may be better able to reach my life goals.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Remember, we are interested in your **honest** opinion on each of the following statements.

	Yes Definitely	Yes Probably	Not Sure	No Probably Not	No Definitely Not
21. I have made a personal pledge to wait until marriage to have sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
22. The best time to have a baby is when I am married.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
23. Using alcohol and/or other drugs makes teens more likely to have sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
24. Even if you have already had sex, you can choose to save sex for marriage only.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
25. Having sex outside of marriage can cause depression.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
26. The best way to avoid an STD is to wait until marriage to have sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
27. I have the willpower to say "no" to sex.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
28. I plan to <u>abstain</u> from sexual activity until marriage.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
29. I know that saving sex until marriage is the best choice.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
30. I can say "no" to other risky behaviors such as alcohol and drug use.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Yes	No
31. Have you ever been sexually active?	<input type="radio"/>	<input type="radio"/>
32. Have you been sexually active in the past six months?	<input type="radio"/>	<input type="radio"/>
33. Have you ever been pregnant or gotten someone else pregnant?	<input type="radio"/>	<input type="radio"/>
34. Have you ever been diagnosed with a sexually transmitted disease (STD)?	<input type="radio"/>	<input type="radio"/>

Within the past year...			
35. Have you used any tobacco products?	<input type="radio"/> Yes →	36. If yes, do you plan to continue to use tobacco products?	<input type="radio"/> Yes
	<input type="radio"/> No (go to Q37)		<input type="radio"/> No
37. Have you drunk alcohol, such as beer, wine, or liquor (not just a sip or taste of someone else's drink)?	<input type="radio"/> Yes →	38. If yes, do you plan to continue to drink alcohol, such as beer, wine, or liquor?	<input type="radio"/> Yes
	<input type="radio"/> No (go to Q39)		<input type="radio"/> No
39. Have you used any illegal drugs?	<input type="radio"/> Yes →	40. If yes, do you plan to continue to use any illegal drugs?	<input type="radio"/> Yes
	<input type="radio"/> No (go to Q41)		<input type="radio"/> No

41. In the past six months, have you seen or heard any messages about sexual abstinence?

<input type="radio"/> Yes →	41a. Where did you hear or see the message? (please mark all that apply)							
	<input type="radio"/> Poster	<input type="radio"/> Billboard	<input type="radio"/> Website	<input type="radio"/> Brochure	<input type="radio"/> Newspaper	<input type="radio"/> Parent	<input type="radio"/> Magazine	<input type="radio"/> Other _____

- 7<sup>th</sup> – 12<sup>th</sup> Grade Classroom  
 Assembly

- ROP  
 Other \_\_\_\_\_

The RIDGE Project is interested in your opinions. Would you please take a few moments to complete this short survey? Your participation is voluntary, and you may stop at any time. Your survey responses will be treated completely confidentially, and will be used for evaluation purposes only. Do not include your name anywhere on this survey. We are interested in your honest opinions, so please mark the best answer for you.

Please remember....

- ☞ *DO NOT put your name on the survey*
- ☞ *There are no right or wrong answers*
- ☞ *Mark the answer that is the closest to how you feel*
- ☞ *Your teacher will not know how you answer questions*
- ☞ *Responses will only be reported for the group, not individuals*
- ☞ *Please do not talk to others during the survey*
- ☞ *If you are not sure of an answer, mark the 'Not Sure' box*
- ☞ *When you are finished, please turn in your survey*

If you have any questions concerning this survey, you may contact Dr. Robert Seufert, (513) 217-4306 at Miami University or Catherine Tijerina, (419) 782-1511 at the RIDGE Project.
